## Liquidity Pool Guide

### Create Liquidity Pool (LP)

1. Select the “Trade” tab.
2. Select the “Add” tab.
3. Choose the currencies you want to create liquidity for.
4. Enter the amount for each currency.
5. Click the “Create” button.
6. Review the amount to send for each currency.
7. Confirm the transaction by clicking the “Confirm” button.
8. Wait until the transaction is completed.

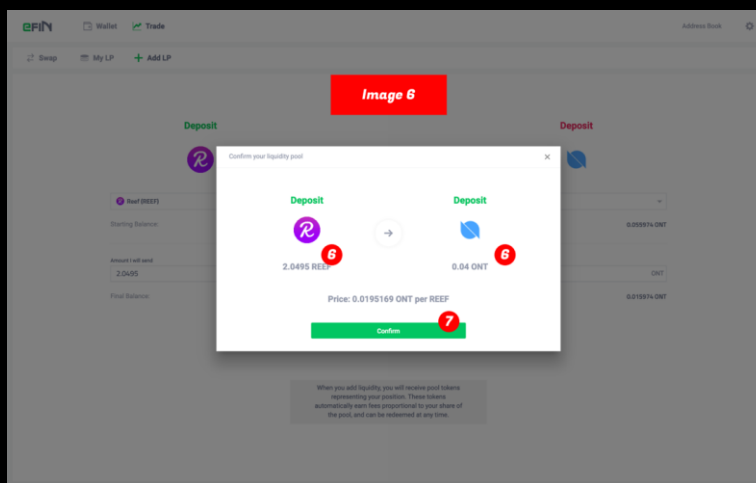

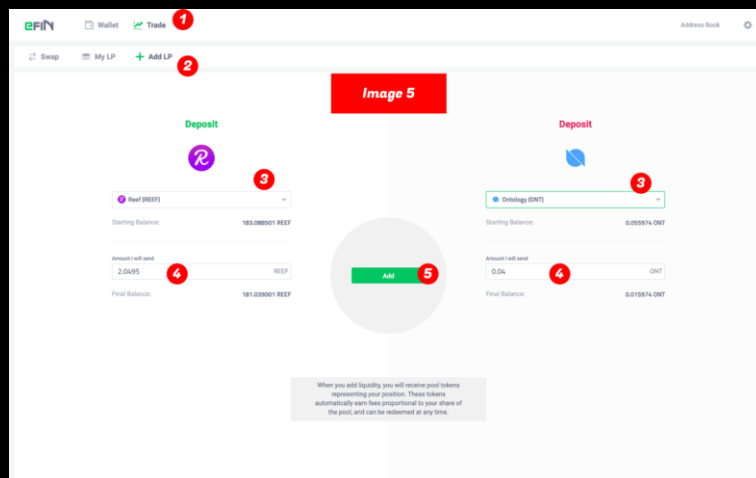

*Note: If the selected currencies already have liquidity, then you can only ADD more liquidity.*

## Add Liquidity Pool (LP)

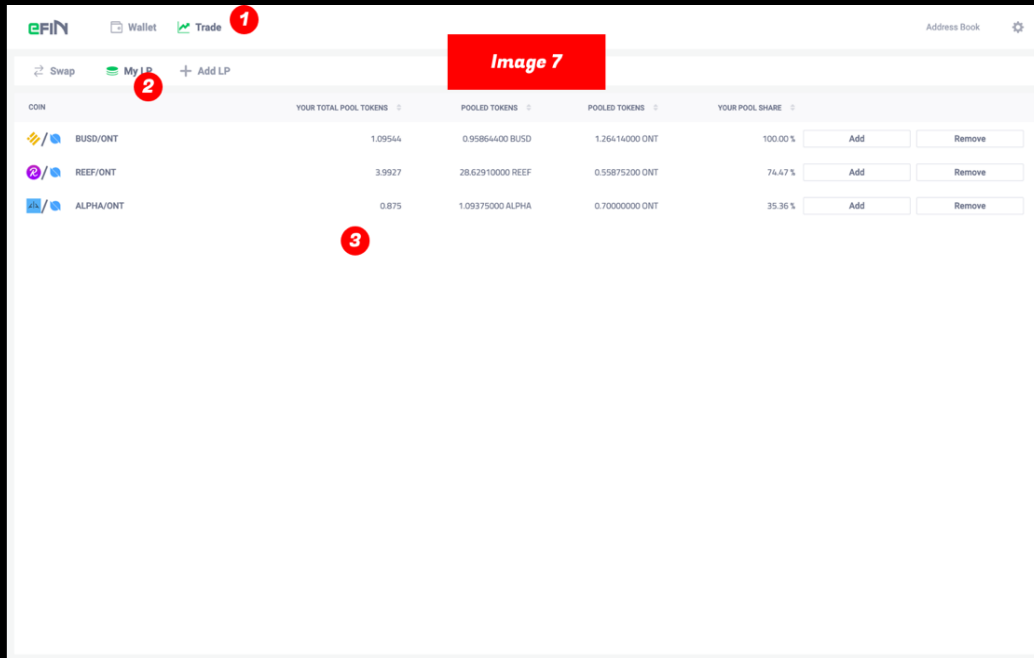

1. Select the “Trade” tab.
2. Select the “Add” tab.
3. Choose the currencies you want to add liquidity to.
4. Enter the amount for one currency and it automatically sets the amount for the other currency using the current rate.
5. Click the “Add” button.
6. Review the amount to send for each currency.
7. Confirm the transaction by clicking the “Confirm” button.
8. Wait until the transaction is completed.

*Note: If the selected currencies don't have an existing liquidity pool, then you must first create it before adding liquidity to it.*

## View My Liquidity Pool (LP)

1. Select the “Trade” tab.
2. Select the “My LP” tab.
3. Wait until the list is loaded.

## Remove My Liquidity Pool (LP)

1. Select the “Trade” tab.
2. Select the “My LP” tab.
3. Choose the currency you want to remove liquidity from and click the “Remove” button.
4. Enter the percentage to remove from your liquidity pool.
5. Click the “Remove” button.
6. Review the amount to receive for each currency.
7. Confirm the transaction by clicking the “Confirm” button.
8. Wait until the transaction is completed.
